

**GPP-1**

**GPP-5**

The **GPP-1** and **GPP-5** Push-Pull Force Gauges are a precision, compact tubular-type mechanical force gauge whose slender shape permits its use in confined areas to measure push-pull forces.

**GPP-1** - Graduated in grams and measures up to 1000 g (35.27 oz). Precision springs individually are calibrated and checked with dead weights. Full scale accuracy and factory calibration is held to  $\pm 1$  graduation.

**GPP-5** - Graduated in both grams and ounces and has full scale accuracy with permanent calibration set to  $\pm 1$  graduation. It is constructed with brass with a satin chrome finish and threaded tips for adjusting the position and length of shafts.
