Re: California Proposition 65 Compliance Statement

Jonard Tools, as part of its ongoing efforts to keep its customers up to date with any regulatory requirements that impacts its products or that of its customers using these products, is providing this Proposition 65 Compliance Statement.

California Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, became law in November 1986. Proposition 65 requires businesses to provide warnings to Californians (and others doing business in the State of California) about exposures to chemicals that are known to cause cancer, birth defects or other reproductive harm. The law states that Californians have the right to know if a chemical may cause “more than 1 extra case of cancer in 100,000 people over a period of 70 years”.

On August 31, 2016, the State of California Office of Environmental Health Hazard Assessment (OEHHA) adopted certain amendments to Article 6, Clear and Reasonable Warnings for California Proposition 65 which became effective on August 30, 2018. For more information on warnings, go to www.P65Warnings.ca.gov.

A Proposition 65 warning needs to be included for any item that is sold into California if an item contains certain substances regulated by California Proposition 65 above the Safe Harbor levels.

Jonard Tools has made the decision to add the Proposition 65 warning to most of its products to inform its customers that the product MAY contain chemicals on the Proposition 65 chemical list, however the product could contain these chemicals in concentrations under the limit or may not contain any chemicals on the list.
